Advantages on a Forklift – Operator Accountability

- Indisputable video proof of accident (1—4 cameras)
 - Most forklift applications use 2
- Video used for training aid for new lift drivers (accidents and near misses)
- Prevents “faked” accidents and injuries
- Protects company from significant liability
- Video used by management to evaluate “trouble” spots in the plant from operator’s perspective
- Video accountability for proper completing of pre-shift checklist
- When in GPS range, can track forklift movement on Google Earth/Maps
- When using optional SENTINEL Software as a Service plan---manager can “look in” on forklift in real time
- “Look in” accountability for “sleeping operators”
- Prevents operators from “texting---talking” on cell phones---reduces damage to rack and product
