

FORKLIFT TRAINING SYSTEMS

BECOME A QUALIFIED FORKLIFT & MEWP TRAINER

Our trainer class is for safety professionals, supervisors, or anyone who trains forklift and MEWP operators. It covers the required training elements as part of OSHA 29 CFR 1910.178 standard which requires trainers to have the knowledge, training, and experience to train operators and evaluate their competency.

Trainers will learn how to conduct required training, identify core characteristics of a successful training class, evaluate performance in the workplace, and emphasize changing operator behavior. Trainers are expected to have experience with the equipment on which they will be training operators. Contact us today to discuss your organization's safety and training needs.

TRAINING DETAILS

- **Class Length:** 2–3 Days (2 Days PIT, 1 Day MEWP)
- **Class Size:** 1–10 trainers. Custom, on-site and virtual, remote classes are available for groups of 4 or more.
- **Locations:** We offer classes at our sites, your facilities, or remotely via Zoom or Microsoft Teams. Travel charges may apply to customer site classes depending on your location.
- **Forklift/MEWP Trainer Costs:** \$995 for 1 trainer, \$900 each for 2–3 trainers in our scheduled classes, add \$500 each for optional MEWP day. Special group flat rate of \$4,000 for up to 10 PIT trainers. Add \$2,000 for optional MEWP day.
- **MEWP Only Trainer Costs:** \$600 each for 1–2 trainers. Special group flat rate of \$2,300 for up to 10 trainers.
