

FORKLIFT TRAINING SYSTEMS

COMPREHENSIVE YARD TRUCK OPERATOR TRAINING

Our comprehensive yard truck operator training helps companies ensure operators meet OSHA 29 CFR 1910.178 standard regarding non-highway tractors. Each class covers fundamental operations, operator responsibilities, pedestrian safety, hazard recognition, and legal liability through classroom instruction, written testing, and hands-on evaluations. After an initial on-site survey, our team identifies hazards, discusses critical safety issues, and then tailors training to your needs.

When you invest in a yard truck operator training class, you're protecting your business and your employees. Contact us today to discuss your organization's safety and training needs.

TRAINING DETAILS

- **Class Length:** 8 hours
 - **Class Size:** 1–5 operators per class.
 - **Location:** Training is conducted at the customer's facility. Travel charges may be applicable.
 - **Cost:** \$1,800 flat rate for 1–5 operators.
- * Due to current OSHA requirements, we can only provide operator training to individuals associated with a company. Training is site-specific, and on-site evaluations require using customer equipment.
- ** Travel charges & minimum billing may apply to operator training conducted outside of Ohio.
