

## FORKLIFT TRAINING SYSTEMS

# COMPREHENSIVE FORKLIFT OPERATOR TRAINING

Our comprehensive operator training helps companies ensure operators meet OSHA standards. Our forklift operator class covers all seven classes of powered industrial trucks (PIT). This class covers fundamental operations, operator responsibilities, pedestrian safety, hazard recognition, and legal liability through classroom instruction, written testing, and hands-on evaluations. After an initial on-site survey, our team identifies hazards, discusses critical safety issues, and then tailors training to your needs.

When you invest in an operator training class, you enhance safety, improve efficiency, and reduce liability risks. Contact us today to discuss your organization's safety and training needs.

### TRAINING DETAILS

- **Class Length:** New operator class is 6–8 hours and re-evaluation class is approximately 2–3 hours depending on number of operators, equipment types, and application.
- **Class Size:** 6–15 operators per class.
- **Location:** On-site at your facility.
- **Cost:**
  - \$175 per new operator at your site
  - \$125 per operator for re-evaluation at your site

\*Due to current OSHA requirements, we can only provide operator training to individuals associated with a company. Training is site-specific, and on-site evaluations require using customer equipment.

\*\*Travel charges & minimum billing may apply.

## KEY CONSIDERATIONS

## OTHER TRAINING SUPPLIERS

Pre-Training Survey identifies OSHA compliance risks to tailor training to your specific site and forklifts

No

Use real-life accidents and near miss videos to understand the dangers of forklift use

Unlikely

Offer classroom training, written tests, and hands-on evaluations for various makes and models

Generic content only

Ensure operator competence with strict pass/fail criteria

Most pass, regardless of performance

Records are backed up electronically, and can be emailed as needed

Paper-based records that require physical mailing

Receive reminders before training expires to maintain compliance

No

Have received extensive and ongoing training

Many providers lack updated knowledge & training

## OSHA STANDARDS

- [OSHA Forklift Standard 1910.178](#) (See part L for training requirements)
