

# FORKLIFT iQ360

The **simple**, entry level fleet management system which combines electronic checklists and on screen PIN driver access.

Forklift iQ360 is a simple telemetry system with easy driver access that monitors and tracks key activities to meet basic compliance requirements.

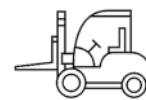

## OSHA Checklist

Forklift iQ360 simplifies electronic "pre-operational" checklist. This OSHA compliant system ensures that each driver performs key checks before operating the vehicle, helping to prevent risks and meeting safety requirements in every use.

## GPS Tracking

Forklift iQ360's GPS tracking reduces operating costs by enabling real-time monitoring of vehicle locations. Optimize routes, avoid inefficiencies, and cut unnecessary expenses, all from one streamlined platform.

## Access Control

Forklift iQ360 optimizes productivity with its on screen PIN access control. This feature ensures that only authorized personnel operate equipment, reducing downtime and improving traceability.

## About Forklift iQ360

- Preop checklist for simple driver access
- Quick start driver on screen PIN access
- GPS location tracking - know where your fleet are at all times
- Simple installation
- Utilization reporting - use valuable preset reporting to identify efficiency potential across your fleet
- User friendly dashboard and reporting
- Cost effective compliance
