

## MATERIAL HANDLING TELEMATICS

# Speed Manager

## Event-Based, Automatic Forklift Speed Control

### Description

The **Speed Manager** is an on-board device, mounted on the forklift that automatically reduces the vehicle's maximum speed in response to specific qualifying events.

The device receives inputs from various devices and sensors also mounted on the vehicle, triggering the Speed Manager to restrict the throttle speed to one of two levels.

By proactively reducing the vehicle's speed prior to a potential collision, this preventive measure effectively averts incidents. Following an event, the system decelerates the vehicle, facilitating thorough inspections and assessments to ensure proper evaluation.

The Speed Manager is only compatible with electronically controlled (fly-by-wire) throttles.

## Key Features

- Reduces speed automatically based on events (e.g., impacts, pedestrian proximity detection, safety non-compliance)
- Enables managers to set two speeds
- Controls speed in both forward and backward direction
- Designed to fit most make and model forklifts with electronic throttles
- Does not affect heavy hydraulic lifting operations and performance

Compatible with electronic throttles (Fly-by-Wire)

## Designed to Revolutionize Your Material Handling Operations

The **Speed Manager** is designed to digitalize and revolutionize your material handling operations by significantly increasing the operations safety by reducing speed and related accidents.

- Increase safety
- Mitigate liability
- Protect brand reputation
- Boost employee morale

# Technical Specifications

## Inputs & Outputs

Inputs	1
Outputs	3
Configurable I/Os	2

## Power

Input Voltage	9-36VDC (up to 72VDC with external voltage converter)
Consumption	30mA @24V (minimum), 300mA @9V (maximum)

## Environmental

Temp, operation	-40° to 85° C
Temp, storage	-40° to 85° C
Ingress Protection	IP40

## Certifications

Electromechanical	CE
Sustainability	RoHS

## User Interface

LEDs	0
------	---

## Technical Specifications (cont'd)

### Size

Dimensions	133(W) x 130(H) x 38(L) mm; 5.2"(W) x 5.1" (H) x 1.5" (L)
Weight	300 gr (~0.66 lbs)

### Installation

Mounting	Screwed in using mounting holes
Connections	Multi-wire, connectors and splicing

Powerfleet (Nasdaq: PWFL; JSE: PWR; TASE: PWFL) is a global leader in the artificial intelligence of things (AIoT) software-as-a-service (SaaS) mobile asset industry. With more than 30 years of experience, Powerfleet unifies business operations through the ingestion, harmonization, and integration of data, irrespective of source, and delivers actionable insights to help companies save lives, time, and money. Powerfleet's ethos transcends our data ecosystem and commitment to innovation; our people-centric approach empowers our customers to realize impactful and sustained business improvement. The company is headquartered in New Jersey, United States, with offices around the globe.
